### About the author

My home town is Cape Town. In fact I've been a resident here for many years. The cultural history of our indigenous people I find fascinating and I enjoy the laid back lifestyle and the beauty of the natural surroundings which are unique to this region at the southern end of the African continent. The Cape is certainly a region of contrasts and Cape Town has a lot to offer it's visitors. It was for this reason that I decided to set up my [Cape Town Travel Adviser](#) website, specifically to provide the local information that potential visitors to the Cape would be looking for.

I wanted to build a popular travel site, one which would not only be of use to Cape Town travellers but a business site which would attract plenty of web traffic, achieve top rankings in the popular search engines and generate a profitable income on the side.

Well, I made it - at minimal cost - and my website is listed by Alexa in the top 1% of all sites on the 'net. No easy task if you don't know how. For me it has been a combination of hard work and use of the best tools in the business.

I have a passion for Cape Town and my website reflects my personal interests and knowledge to my readers. You may also have an interest or passion you would like to put across in the form of a simple yet profitable website.

After all, why build just a Web site... when you could build a Web business?
